

HIGH TIP BUCKET

<http://tiny.cc/hightipbucket>

FEATURES & BENEFITS

- Hydraulic operated
- Increased dump height (+ 60 cm / 24 in)
- Excellent volume

High tip bucket is the right choice when you need to reach higher and longer. The bucket is equipped with two hydraulic cylinders that push and tip the bucket over its front edge, which gives considerably more tipping height than with a normal bucket. Increase the dump height of the machine by almost 60 cm (24 in) using the high tip bucket. This increased reach enables loading high-side trucks without the need of a ramp. The bucket is an ideal tool for snow removal, loading of wood chips and for loading works on recycling plants etc. The bucket is available with a flat cutting edge.
